

MURPHY PLANS DOOM OF HILL

With the Aid of Grout the Tammany Leader Is Busy at Hot Springs Laying Wires to Bring About a Coup.

COMPTROLLER HIGH IN WIGWAM'S CONFIDENCE.

His Intelligence and Great Political Popularity Have Won for Him a Great Place in the Estimation of Leader Murphy.

HOT SPRINGS, Va., Nov. 11.—Edward M. Grout is spending a great deal of time in the company of Charles F. Murphy, the Tammany leader. It is certain that Mr. Grout is having considerable to say about the men who will be appointed by Mayor McClellan to assist in the government of New York City.

Mr. Grout has stepped in a few short weeks from a position of power in the Fusion administration to a position of power in Tammany Hall. His advice is sought by the leader, and he has without a doubt the promise of the next Democratic nomination for Governor of New York. Mr. Murphy has a great deal of respect for the Comptroller's political and financial ability.

Will Operate Campaign. In the next State campaign the chances are that Mr. Grout will have charge of the work in the State, even if he should not secure the nomination. It is known that he cherishes a desire to sit on the Supreme Court bench and this ambition might serve to keep him from accepting the nomination for Governor. Tammany Hall is in a position to give him the Supreme Court position within a few years.

What makes a particular impression upon Mr. Murphy is the fact that Mr. Grout ran ahead of Mayor Low in the election two years ago, and then turned around and ran ahead of the Tammany ticket in the last election. He figures that a man so strong with the people as that would sweep New York City by such a tremendous plurality that the adverse vote up-State could be overcome.

David B. Hill Doomed. With the assistance of Mr. Grout and the Brooklyn organization, Mr. Murphy intends to run David B. Hill out of Democratic politics in the State of New York. He is working for the control of the Democratic State Committee, and to all practical purposes he has the control. The Hill men are strong in the Greater New York district, but those from Erie, Rensselaer, Clinton and Sullivan are strong in the Hill men. No Tammany man of prominence has followed Mr. Murphy here and he does not expect any for some time. He has arranged to stay here for two weeks. Mr. Grout will probably leave as soon as he feels sufficiently rested. He has improved greatly in health and strength.

BRAVE MAN SAVES WOMAN TWICE OVER

Rescues Her from Harlem River and Carries Her to His Home to Be Cared For by Mrs. Mosher.

Stephen H. Mosher, a watchman, with a shanty at the foot of East One Hundred and Thirty-fourth street, on the Harlem River, for the third time in four months proved himself a hero yesterday when he rescued a woman from drowning. He further proved his humane and kindly disposition by carrying her to his home at No. 1536 Park avenue, where his wife cared for her until an ambulance arrived.

Apparently no one saw the woman fall into the river, but her cries attracted the attention of people on the banks, who watched her struggles without making any effort to save her. Mosher's son, Stephen, Jr., ran to his father's shanty, where Mosher was eating his supper.

"Pop, there's a woman in the river," he shouted. "I'll save you," Mosher shouted in response to her cries, but the woman struggled so hysterically when Mosher grasped her that he was in danger of drowning, too. Before he could quiet her Mosher had to strike her in the face. Then he swam ashore with his burden.

The woman was unconscious when placed on the bank. There was a delay in the arrival of the ambulance. Mosher picked her up in his arms and carried her to his home. Mosher removed her wet clothing and resorted her to consciousness.

The woman said she was Mary Dally, married, forty-nine years old, living at No. 1011 Boston Road in the Bronx. She had no idea how she got into the river, she said. Later she was taken to the Harlem Hospital, where she was bed and had hot drinks served to her by his wife.

HELD FOR ASSAULT.

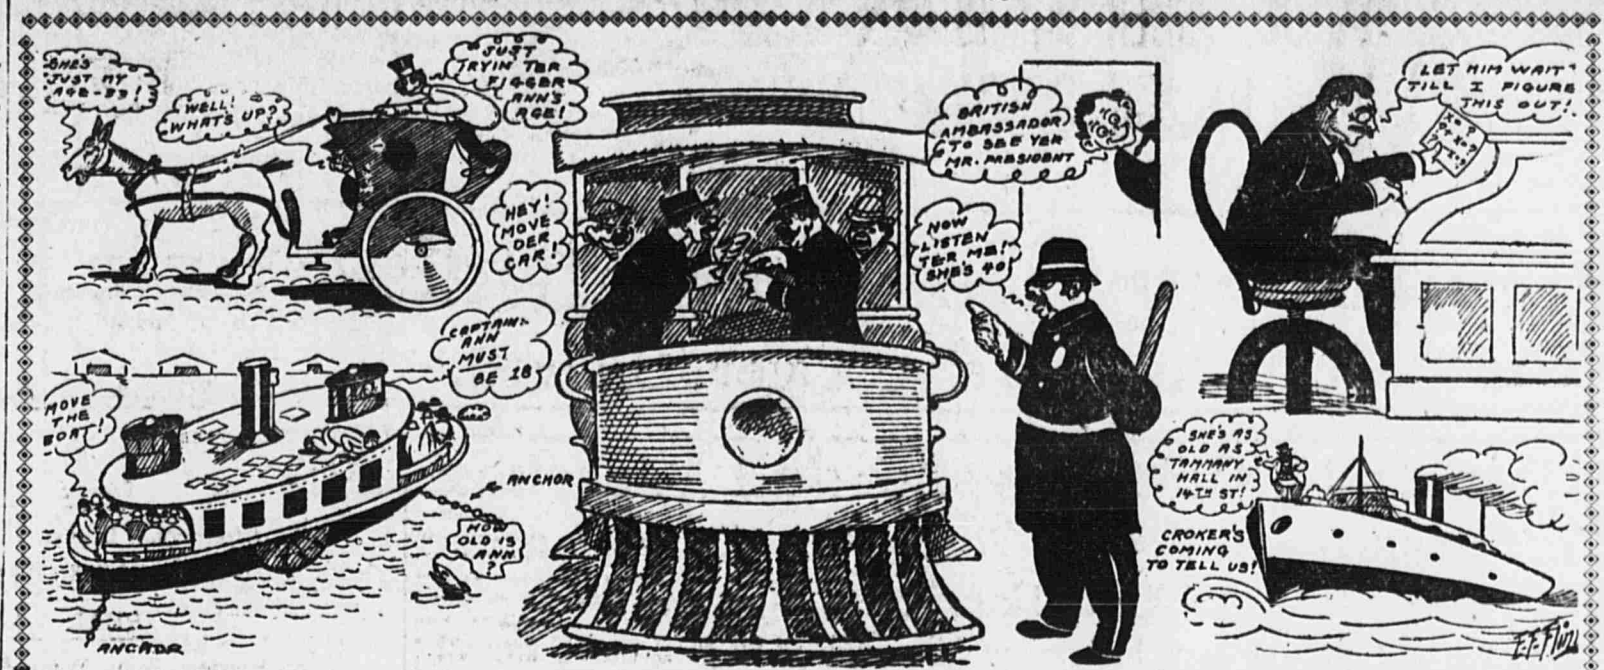

Dentist's Wife Charges Him with Striking Her.

Dr. Bernard Brandels, a dentist of No. 22 Second street, was held to-day in \$100 bail for examination to-morrow by Magistrate Pool in the Essex Market Court. Brandels is charged by his wife, Rose, with having assaulted her on Oct. 10.

Mrs. Brandels was released only yesterday in the same court on the charge preferred by her husband of having conspired with several alleged east-side thugs to kidnap her.

Mrs. Brandels declared in her affidavit that her husband had struck her in the face with his clenched fist, bruising her and knocking her down. Dr. Brandels sent out for bail.

ON LAND AND SEA DO MEN SEEK TO LEARN THE ANSWER TO THE FAMOUS QUERY: "HOW OLD IS ANN?"

BOY HIGHWAYMAN HAS LONG RECORD

Remarkable Criminal Is Only Nineteen, Yet Has Served Three Years in Four Different Prisons.

Judge Newburger expressed amazement today when he learned the startling criminal record of nineteen-year-old William Cole, arraigned before him for highway robbery. The crime charged against the boy was the deliberate holding up of a man on the Bowery the night of Oct. 22 under the full glare of an electric light. He stole the man's watch, but was caught before he got far away.

When the young highwayman was arraigned the Court asked if he ever had been arrested before. Then Judge Newburger began to open his eyes as the youth related that three years ago, when he was only sixteen years old, he was arrested in Boston for burglary and sentenced to five years' imprisonment. After serving twenty-two months he was pardoned by Gov. Crane, of Massachusetts.

He went out of prison but a few months when he was again arrested and sent to the Boston Prison Ship for two years. After serving four months he escaped from the prison. He was recaptured a month later and sent to the Marine Hospital. He escaped from there six weeks later and came to New York.

He had been in New York a few weeks when he was arrested and sent to the Workhouse to await trial. After serving five months he escaped from Blackwell's Island after swimming eight miles to the Long Island shore. Judge Newburger held the remarkable young criminal for further investigation into his record. He can get twenty years for the crime he committed last month.

MAGISTRATE PAYS PRISONER'S FINE

"You Have Done Wrong, My Boy," He Says, "but I Believe that You Are an Honest Lad."

In order to save a seventeen-year-old lad from the stigma of a conviction, Magistrate Crane, in the Harlem Court, to-day, paid out of his own pocket a sum of money which the young prisoner was accused of having wrongfully converted to his own use.

"You have done wrong, my boy, I know," said the Magistrate. "But I believe that you are an honest lad and to me it would seem terrible to have to pass sentence upon you."

The young prisoner was Thomas Longerson, seventeen years old, of 201 West One Hundred and thirty-fourth street. He was arrested last night at One Hundred and Twenty-second street and Eighth avenue by Policemen O'Neill, of the West One Hundred and Twenty-fifth street station, on the complaint of John Higgins, a driver for Simpson-Crawford Company, who lives at One Hundred and Twenty-fourth street and Linwood avenue.

Longerson was formerly employed by the above firm. He knew Higgins, and when he met him on Oct. 22 last he took a drive with him and assisted him in delivering parcels. The driver asked Longerson to deliver a C. O. D. parcel that evening and collect \$1.50. The lad did as he was requested, but he failed to return the collection to Higgins.

The following day Higgins met the lad, who confessed that he had appropriated the money to his own use. He promised to return the money the next day, but failed to do so. Last night when Higgins saw him on Eighth avenue, he had him arrested.

When arraigned before Magistrate Crane the lad said he had no intention of stealing the money, and that if given an opportunity he would repay it.

"My people live in Unionport," he said, "and if my mother heard of this it would break her heart. If I've done wrong I don't want her to know it, because I know she would be sad."

This reference to his mother affected Magistrate Crane, and instead of censuring the lad offered him encouragement.

He then asked Higgins if he wanted to press the complaint. The driver said he was willing to forgive him. The firm, however, he said, had instructed him to prosecute and he was only acting in obedience to orders. Higgins then called up Simpson-Crawford Company and explained the circumstances to the company and the company agreed to let-up on the prisoner. The Magistrate then took \$1.50 from his pocket and handed it to Higgins, and young Longerson was cleared.

QUERY "HOW OLD IS ANN?" EXCITES THE POPULACE

Some Ungallant Mathematicians Set Her Down at 84 Years, Which Is Rude; Others Think She Is a Twin, and the Lowest Estimate, Which Will Please Her, Is Sixteen.

"Mary is twenty-four years old. She is twice as old as Ann was when Mary was as old as Ann is now. How old is Ann?"

The letter-writers have taken up the problem now. Every mail brings an avalanche of solutions to the office of The Evening World. They come from all over the Eastern States and betray a weird collection of arithmetical minds.

Many agree that Ann is eighteen years old. Some work out the proof in a few words; others devote yards of paper and mountains of figures to the demonstration. There is a surprisingly large percentage of persons who believe that Ann is sixteen years old.

With commendable frankness some of the writers confess that they don't know how to solve the problem with figures; they just think that Ann is such and such an age and they know that they cannot be wrong. These persons generally guess that Ann and Mary are twins or that Ann is forty-eight years old.

From the tone of telephone messages received at The Evening World office yesterday and to-day there is evidently a lot of betting being done on the age of Ann. A young woman called up to-day and asked in a pleading voice if it was not true that Ann is eighteen years old. She was told that the man who confessed to having first sprung the question has made affidavit that eighteen years is the answer.

"All us girls at the store are betting that Ann is eighteen years old," answered the girl. "The boss is betting that she is sixteen and there hasn't been any work done for two days while he has been trying to figure out the proof."

Here are a few of the letters received on the age of Ann:

Simple Algebraic Solution. To the Editor of The Evening World: According to my algebraic solution of the problem of Ann's age I get the following: Let X=Ann's age. Then X-12=24. Reversing, X+X=24+12. 2X=36. X=18. Ann's age.

To prove the example: 18-12=6. 24-6=18. STEPHEN VARNI, No. 52 President st., Brooklyn, Nov. 10.

Thinks Ann Is Twelve. To the Editor of The Evening World: Mary is twenty-four years old. McClellan is elected. Ann is twelve years old. W. J. McMillan, Freehold, N. J., Nov. 10.

Was Easy for Julius. To the Editor of The Evening World: How old is Ann? She is twelve years old. N. B.—I happened to come into a drug store to-night and witnessed two druggists trying their utmost to solve the above problem, but in the end they gave it up as something impossible to solve. Out of curiosity I looked at that question in The World, then for the first time and solved it as above.

JULIUS SOLOV, No. 213 Clinton street, Manhattan. Thinks She Is a Twin. To the Editor of The Evening World: How old is Ann? She is just twenty-four years old. PETE REILLY, Pleasantville, Nov. 9.

Again the Twin Proposition. To the Editor of The Evening World: I have read some of the humorous letters about the age of Ann, and have given the subject considerable attention. The only answer that seems correct is that they are twins, both twenty-four years old. Mary is twice as old as Ann was when Ann was twelve years old. Being of the same age Ann is as old as Mary is to-day.

LESEY BACH, No. 2465 Broadway, N. Y., Nov. 10. Ann a Mere Child. To the Editor of The Evening World: After studying the Ann problem I figure her age as twelve years old. P. C. No. 129 East Eighty-second street, City. This Surely Is a "Dream."

To the Editor of The Evening World: In answer to the age of Ann would say Ann is sixteen years at present time. The puzzle in the question is: Mary is twenty-four years old. She is twice as old as Ann was when Mary was as old as Ann is now. She is the present tense and should not be used in this sentence, as Mary was twice as old as Ann when she was as old as Ann is now. If Mary is twenty-four years she will never be twice as old as Ann again as when she was sixteen years (the present age of Ann), as she is eight years older (Mary twenty-four and Ann sixteen); difference, eight years than

Ann, and 8+8=16 years, so when Ann was eight years Mary was twice as old (sixteen years) and she will never be twice as old again, as Ann only has one eighth birthday in her life, so there is where the puzzle is in saying Mary is twice as old, instead of saying Mary was twice as old when she was as old as Ann is now.

The proof in algebra: Mary was twice as old as Ann, so Ann's age as X, and Mary was twice as old, so Mary was 2X, so Mary's present age is 2X+X=3X. If Mary's present age is 24, why, Ann's age was X, so if 24 is 3X, why, X is one-third of 24, or 8, so when Ann was eight, Mary was twice as old (sixteen years), so if Mary is twenty-four years old, Ann is sixteen, as Mary is eight years older than Ann is now. A. B. A. M. dream. J. HOFFMAN, No. 606 Grand street, Brooklyn, Nov. 9.

Here's a Bunch of Figures. To the Editor of The Evening World: I have undertaken the task of solving the problem which seems to vex every body, the solution of which seems very simple. Let X=No. of years in Ann's age. Then 2X-X=No. of years since Mary was as old as Ann is. X=24-X=24. Transposing, 2X-X=24-X. Uniting, X=24. Divide both members of the equation by X-18. Ann's age is eighteen years.

ANTHONY BAPTELLA, No. 976 Southern Boulevard, N. Y., Nov. 10. Just Thinks So. To the Editor of The Evening World: I have tried to puzzle this out about how old Ann is, and I think that if Mary is twenty-four years old Ann is twelve years old. I cannot explain why I think so, but I do. W. L. SMITH, Rockville Centre, Nov. 10.

A Short Misstatement. To the Editor of The Evening World: Ann is sixteen years old. WILLIAM CONNER, New York, Nov. 9, 9 Jane street, Pshaw! Too Easy.

To the Editor of The Evening World: In reference to Ann's age, would say that she is twelve (12) years old; and am surprised that as yet no correct answer has appeared in your columns. Any intelligent school boy or girl should be able to solve the problem mentally. DANIEL JOHNSON, No. 63 Third avenue, Nov. 10.

This Man Knows Her. To the Editor of The Evening World: I am highly indignant at the way that young miss is being abused, and can't look on any longer without saying something in the young girl's defense, since she is, or seems, too kind to do so herself.

DOCTOR, VIOLENT, SCATTERS CROWD

Virginia Physician Smashes Furniture in Room and Armed with Club, Dashes Through Throng Before House.

After smashing the furniture in the room which he and his wife occupied, and alarming the other occupants of the boarding-house at which they were stopping, Dr. Frederick W. Chapin, of Hot Springs, Va., was taken to Bellevue Hospital and placed in the psychopathic ward.

The first intimation the other residents of the house at No. 42 West Seventeenth street had of Dr. Chapin's condition was when his wife became alarmed by his actions and screamed for help. Dr. Chapin, after smashing the furniture in the room, armed himself with the leg of a broken chair, dashed through the crowd and out of the house. He was caught and overpowered by Policemen Lafferty, of the West Thirtieth street station.

Dr. Chapin's daughter resides at No. 12 East Fifteenth street. She was sent for by her stepmother and arrived after her father had been taken to Bellevue. It was said at the boarding-house where Dr. Chapin and his wife resided they had been taking drugs and that Chapin said his father might have been taking drugs experimentally, but that he was not addicted to their use. It does not believe her father's brain is seriously affected, and looks for his recovery in a few days.

self. I've known her since she was a little girl of eight years. She wore short skirts then. That is eight years ago, and whoever means to insinuate that she is any more than sweet sixteen had better go way back to school and sit down. TH. P. MAURUS, Nov. 10.

A Good Suggestion. To the Editor of The Evening World: Regarding Ann's age, why not leave it to the gal herself? If she's, say, sixteen, she will certainly try to impress others that she is older, but if, say, thirty, why, she is not a day older than eighteen. Yours, truly, P. SCHER, New York, Nov. 10.

Positive She Is Twenty-four. To the Editor of The Evening World: Ann is twenty-four years old and if they are sisters you may call them twins. Mary is twenty-four. If she is twice as old as Ann was at the time specified Ann was twelve. Now, when Mary was as old as Ann is now (now being the specified time), so is this time Ann is twenty-four, the same as Mary.

I am positive my answer is correct, but probably my explanation is as puzzling as the query. I hope the correct answer will be published, as I am anxious to know if I am correct, although I feel certain I am. D. HOFFMAN, No. 265 Central Park West.

Another Member of Ann's Set. To the Editor of The Evening World: Ann is a pretty haughty girl. When I ask her how old she is she says one year older than I was last year. Still I don't give up. Last night I took Ann out for a ferryboat ride, and she hinted something to me about inviting us all to her next birthday and she will tell her age. BENJ. FIDELBAUM, Nov. 10.

Sure Ann Is Forty-eight. To the Editor of The Evening World: I have figured out Ann's age and I am sure in my estimation that Ann is forty-eight years old. W. A. VON SIRE, No. 229 Sanford street, Brooklyn, Nov. 10.

Ann Won't Like This. To the Editor of The Evening World: In answer to your question how old Ann is, I make out the answer forty-eight years old. JOSEPH F. RAMSEY, No. 198 William street, New York, Nov. 10.

A Biblical Answer. To the Editor of The Evening World: I think I can safely say she was four-score and four years old, the oldest woman of that name in the Bible. ADOLPH COHEN, Brooklyn, Nov. 10.

Some Queer Arithmetic. To the Editor of The Evening World: Having seen your puzzle in The Evening World without any correct answer, I take pleasure in answering the same. When Ann was 8 years old, Mary was 16, which is twice as old, now Mary being 24, which is 3 years older, makes Ann 26 years, which was Mary's age at the time she was twice as old as Ann. ADOLPH COHEN, Nov. 10, 157 West Twenty-third street.

OLD STATEN ISLANDER. KINGSTON, N. Y., Nov. 11.—Walker Tompkins, formerly a prominent merchant of Stapleton, Staten Island, is dead here in his seventy-fifth year. He retired six years ago and had been living here since.

Thousands of Women Restored To Health by Swamp-Root.

Women as Well as Men Have Kidney Trouble and Never Suspect It.

WOMEN suffer untold misery because the nature of their disease is not always correctly understood; in many cases when doctoring they are led to believe that womb trouble or female weakness of some sort is responsible for their ills, when in fact diseased kidneys are the chief cause of their distressing troubles. Perhaps you suffer almost continually with pain in the back, bearing-down feelings, headache and utter exhaustion.

DIDN'T KNOW I HAD KIDNEY TROUBLE.

I had tried so many remedies without their having benefited me that I was about

discouraged, but in a few days after taking your wonderful Swamp-Root I began to feel better.

TO-DAY I AM IN SPLENDID HEALTH.

About 18 months ago I had a very severe attack of grip. I was extremely sick for three weeks, and when I finally was able to

leave my bed I was left with excruciating pains in my back, which convinced me that I had a severe kidney trouble. My physical condition was such that I had no strength and was all run down.

My sister, Mrs. C. E. Littlefield, of Lynn, advised me to give Dr. Kilmer's Swamp-Root a trial.

I procured a bottle, and inside of three days commenced to get relief. I followed up that bottle with another, and at the completion of this course I was completely cured. My strength returned and to-day I am as well as ever.

My business is that of canvasser. I am on my feet a great deal of the time, and have to use much energy in getting around. My cure is therefore all the more remarkable and is exceedingly gratifying to me. Sincerely yours,

MRS. H. N. WHEELER, 23 Prospect st., Lynn, Mass.

I purchased a bottle sent free by mail. In taking Dr. Kilmer's Swamp-Root you afford natural help to Nature, for Swamp-Root is the most perfect healer and gentle aid to the kidneys that has ever been discovered. Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

My kidneys and bladder gave me great trouble for over two months and I suffered untold misery. I became weak, emaciated and very much run down. I had great difficulty in retaining my urine, and was obliged to pass water very often at night and day. After I had used a sample bottle of Dr. Kilmer's Swamp-Root, sent me on my request, I experienced relief, and I immediately bought of my druggist two large bottles and continued taking it regularly. I am pleased to say that Swamp-Root cured me entirely. I can now stand on my feet all day without any had symptoms whatever. Swamp-Root has proved a blessing to me. Gratefully yours,

MRS. E. AUSTIN, 19 Nassau st., Brooklyn, N. Y.

MRS. A. L. WALKER

MRS. H. N. WHEELER

MRS. E. AUSTIN

To Prove What SWAMP-ROOT, the Great Kidney, Liver and Bladder Remedy Will Do for YOU, Every Reader of The Evening World May Have a Sample Bottle Sent Free by Mail.

SPECIAL NOTICE.—No matter how many doctors you have tried—no matter how much money you may have spent on other medicines—you really owe it to yourself, and to your family, to at least give Swamp-Root a trial. Its staunch, wonderful discovery, Swamp-Root, sent absolutely free by mail, also a book telling all about Swamp-Root, and containing many of the thousands upon thousands of testimonial letters received from men and women who owe their good health, in fact their very lives, to its wonderful curative properties. In writing to Dr. Kilmer & Co., Binghamton, N. Y., be sure to say that you read this generous offer in The New York Evening World. If you are already convinced that Swamp-Root is what you need, you can purchase the regular fifty-cent and one-dollar size bottles at the drug stores everywhere.

AUTOMATIC DOORS MAKE LINER SAFE

The Deutschland Has New Device That Shuts Watertight Compartments Within a Few Seconds of Alarm.

The Deutschland is the first transatlantic liner afloat to be equipped with automatic watertight doors, by which the whole length of the ship, and which is in connection with four steam hydraulic accumulators which are of sufficient capacity when fully charged to supply a pressure of 500 to 700 pounds per square inch. They can close the twenty-three bulkhead doors in from ten to fifteen seconds.

The accumulators and the hydraulic pump which supplies them are all above the water mark, so that they would still be able to work if the water got into the hold.

The pressure fluid consists of three parts of water to one of glycerine, which is worked down the hose and bursting of pipes. In addition, it acts as a lubricant to bearing surfaces and also as a preservative to leather, packages and joints. The temperature of the mains, which in many cases pass across the top of the boilers, is kept down by constant circulation.

A warning that the doors are to be closed is given to the men who may be in the hold by a gong above each door, which is worked down the hose and bursting of pipes. In addition, it acts as a lubricant to bearing surfaces and also as a preservative to leather, packages and joints. The temperature of the mains, which in many cases pass across the top of the boilers, is kept down by constant circulation.

The doors are closed by means of a handle at the side of the door, which is worked down the hose and bursting of pipes. In addition, it acts as a lubricant to bearing surfaces and also as a preservative to leather, packages and joints. The temperature of the mains, which in many cases pass across the top of the boilers, is kept down by constant circulation.

BRIDE AND SPOUSE BECOME TRAMPS

Wearing Boy's Clothes, Brooklyn Girl and Husband Beat Their Way to Chicago and Are Arrested for Vagrancy.

TOLEDO, Nov. 11.—Mr. and Mrs. Michael Singer were given money
